Managing and Automating **Green** Communities

The myHome package of Integrated Products helps communities do all this and more;

1. Communicate more effectively to *All* members using;
 - Community Web Site
 - Community eMails
 - Text Messages to phones
 - Digital Signage to lobby, elevators,... etc
 - Messages to Home Touch Panels
2. Simplify accessibility to Community Professional Services;
 - Valet Services (with historical data)
 - Concierge
 - Maintenance (complete package in Q2-08)
 - Restaurant Portals
3. Creates a easy to use Information Web Site.
4. Remote Automation and Mgt of homes and spaces.
5. Digital Signage for Community activities, weather, etc...
6. **Green** Community support of Lighting, HVAC, etc...
7. Historical Tracking data for optimizing utilities.

- Does your Community give your residents 24/7 access to the amenities you offer?
- Are your residents informed of the Business and Social activities within the community?
- Would you like your Community to stand out against the competitors when it comes to TLC for the residents?
- Do you want your residents to have References that state “I would never want to leave” ?

simplifying **Building Automation**

Valet / Remote Automation / Activities / Communications / Services

VALET:

The myHome package allows residents to request their car through their touch panel in real time or in advance. The resident simply chooses which car they would like and when.....let the system do the rest. 1-2-3 Relax!

ACTIVITIES:

Make your community stand part from all the others with an ACTIVITIES PAGE with real time updates. This is ideal for both Adult living and Family oriented communities. Whether there is an assigned Activities director or just a volunteer social coordinator this feature keeps everyone in touch.

ADVERTISING:

“..... You control advertising on your community site. Keep it simple or let it be a profit center to the community.” Add paid advertising to your community site to offset the automation charges and bring benefits to the residents!

SERVICES:

Any local Services can be added such as DRY CLEANING, CAR WASHES, and FITNESS PROGRAMS, BABYSITTING and DOG WALKING. Merchants typically request a minimum # of residents before they commit to the Community.

LINKS TO RESTAURANTS:

Add links to the Communities favorite Pizza Parlor, Chinese and Neighborhood choice Restaurants. This will simply take you to their webpage and menu. Therefore the quickly changing menus will be at your fingertips real time

LINKS TO HOME SERVICES:

Add Links to the local grocery store to order items online for pick up or delivery with their Service charge. This is a service that is offered by the majority of grocery chains. YEAH! Personal Shopper.
